PROFESSIONAL SUMMARY

Innovative and results-driven Full-Stack Web Developer with hands-on experience in developing and deploying robust, scalable web applications. Proficient in both front-end and back-end development, with a strong focus on creating seamless user experiences and efficient data management systems. Adept at working independently and in collaborative team settings, with a passion for learning and implementing the latest technologies and best practices.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES13), HTML, CSS, React, jQuery, Handlebars, Tailwind CSS, Sass, Bootstrap, Apollo, Node.js, Express.js

Databases: SQL, NoSQL, MongoDB, PostgreSQL, Sequelize

Tools & Platforms: GitHub, GraphQL

Projects

Battle Brain | [Github](#) | [Website](#)

- **Role:** Back-End Developer & Database Engineer, Front-End Integrator
- **Tools & Technologies:** React, GraphQL, MongoDB, Node.js, Express.js, Tailwind CSS
- **Summary:** Architected and developed a full-stack trivia game featuring both single-player and multiplayer modes. Engineered a scalable GraphQL API to efficiently handle real-time data interactions. Implemented a robust MongoDB database schema to manage user data and game sessions. Integrated Tailwind CSS for responsive and dynamic front-end design, ensuring optimal performance and user engagement. Deployed on Heroku for global accessibility.

Reading Nook | [Github](#) | [Website](#)

- **Role:** Full-Stack Developer
- **Tools & Technologies:** JavaScript, Handlebars, Express.js, Sequelize, PostgreSQL, Tailwind CSS
- **Summary:** Developed a full-stack web application that serves as a personalized digital library, allowing users to explore, favorite, and manage their book collections. Engineered RESTful APIs with Express.js for seamless communication between the front-end and back-end. Utilized Sequelize ORM for efficient database operations with PostgreSQL, ensuring data integrity and optimal query performance. Designed a mobile-first, responsive interface using Handlebars and Tailwind CSS, enhancing user interaction and engagement. Deployed on Netlify for fast and secure access.

League Team Builder | [Github](#) | [Website](#)

- **Role:** Full-Stack Developer
- **Tools & Technologies:** JavaScript, HTML, Tailwind CSS, jQuery
- **Summary:** Created an interactive team composition tool for League of Legends, allowing users to strategically plan and analyze team setups against opponents. Leveraged jQuery for dynamic DOM manipulation and real-time updates, enhancing user experience. Developed custom algorithms to validate team composition rules and provide recommendations based on meta-game data. Tailored the front-end with Tailwind CSS to ensure a visually cohesive and responsive design across all devices. Deployed on GitHub Pages for easy access and use.
